Complete Contents of the Proceedings of the Fifth International Conference on Vibrations at Surfaces, Grainau (Eibsee), F.R.G., 6-10 September 1987

## TABLE OF CONTENTS

Part A
Contents of Volume 44 (the first of two Conference volumes)

Foreword XIII

## LIST OF PAPERS PRESENTED
(Invited papers marked by asterisk)

Hydrogen vibrations at transition metal surfaces
D.R. Hamann* (Murray Hill, NJ, U.S.A.) 1

Hydrogen-induced reconstruction on W(100) and Mo(100) by surface infrared spectroscopy
Y.J. Chabal, S.B. Christman, J.J. Arrecis (Murray Hill, NJ, U.S.A.), J.A. Prybyla and P.J. Estrup (Providence, RI, U.S.A.) 17

Surface vibrations on clean and hydrogen saturated W(100)
J.L. Erskine, J.P. Woods, A.D. Kulkarni and F.W. De Wette (Austin, TX, U.S.A.) 27

Chemical effects on vibrational properties of adsorbed molecules on metal surfaces
H. Ueba (Toyama, Japan) 37

Dipole-dipole coupling in the $N_2$ overlayer on Ni(110)
M.E. Brubaker and M. Trenary (Chicago, IL, U.S.A.) 47

Coadsorption of hydrogen and CO at Ni(110) surfaces
J. Bauhofer, M. Hock and J. Küppers (München, F.R.G.) 55

Reflection-absorption infrared spectroscopy of adsorbates on a Cu(111) single crystal surface
W. Erley (Jülich, F.R.G.) 65

Hexagonal overlayer of hydroxyl groups on Ni(100) modified by sulfur: Effect on the $H_2$-$D_2$ isotope exchange reaction
T. Yamada, J. Nakamura, S. Kawamura and K. Tanaka (Tokyo, Japan) 79

IR spectra of small molecules adsorbed on carbon films. Adsorption potentials and spectral shifts
E. Tsidoni, Y. Kozirovski, M. Folman (Haifa, Israel) and J. Heidberg (Hannover, F.R.G.) 89

A Fourier-transform reflection-absorption infrared spectroscopic study of alkyne adsorption on Cu(111)
M.A. Chesters and E.M. McCash (Norwich, U.K.) 99

Ethylene-oxide adsorption on Ni(111): HREELS and ARUPS investigations
C. Benndorf and B. Nieber (Hamburg, F.R.G.) 109

ATR-FTIR experiments with $R_8(Si_8O_{12})$ on Ge and ZnSe
R. Beer, H. Bürgy, G. Calzaferri and I. Kamber (Bern, Switzerland) 121

Adsorption of pyridine on Ru(001): A study by high resolution electron energy loss spectroscopy
P. Jakob and D. Menzel (München, F.R.G.) and D.R. Lloyd (Dublin, Ireland) 131

Reactivity of carbon dioxide at nickel (110)
H. Lindner, D. Rupprecht, L. Hammer and K. Müller (Erlangen, F.R.G.) 141

HREELS of the adsorption and reaction of CN on clean and oxygen covered Cu(111)
M.E. Kordesch, W. Stenzel, H. Conrad (Berlin, F.R.G.), W. Feng (Beijing, China) and M. Weaver (West Lafayette, IN, U.S.A.) 149

Oxidation of Si(100)2x1 and $Ge_xSi_{1-x}$(100)2x1
J.A. Schaefer (Kassel, F.R.G.) 163

HREELS study of the oxidation of Al(111) between 300 and 20 K
C. Astaldi, P. Geng and K. Jacobi (Berlin, F.R.G.) 175

Helium atom scattering studies of thermal energy vibrations on the clean and adsorbate-covered Ni(100) surfaces
R. Berndt*, J.P. Toennies and Ch. Wöll (Göttingen, F.R.G.) 183

Phonon spectrum of the (2x1)O-Ag(110) surface
G. Bracco, R. Tatarek, S. Terreni (Genova, Italy), F. Tommasini (Trieste, Italy) and U. Linke (Jülich, F.R.G.) 197

Surface phonons in GaAs(110)
R.B. Doak and D.B. Nguyen (Murray Hill, NJ, U.S.A.) 205

Structure and dynamics of rare-gas layers on Pt(111)
K. Kern*, P. Zeppenfeld, R. David and G. Comsa (Jülich, F.R.G.) 215

Resonance scattering of electrons from orientated $O_2$ physisorbed on graphite
R.E. Palmer, J.L. Wilkes and R.F. Willis (Cambridge, U.K.) 229

Theory of off specular electron energy loss cross sections
D.L. Mills* (Irvine, CA, U.S.A.) 239

A HREELS study of the $V_2O_5$ (001) surface phonon spectrum
H. Poelman, J. Vennik (Gent, Belgium) and G. Dalmai (Lille, France) 251

Hydrogen on Ni(110): frequency shifts of substrate phonons and new hydrogen modes
H. Ibach, S. Lehwald and B. Voigtländer (Jülich, F.R.G.) 263

Surface phonon dispersion of ultrathin epitaxial Ag films on Ni(100) and Cu(100) substrates
W. Daum* (Jülich, F.R.G.) 271

Lattice dynamics of the Si(111) surface: folding effects in the 2x1 structure
L. Miglio, P. Ruggerone and G. Benedek (Milano, Italy) 281

Surface phonon dispersion of ZrC(100)
R. Franchy (Jülich, F.R.G.), C Oshima, T. Aizawa, S. Souda, S. Otani and Y. Ishizawa (Ibaraki, Japan) 289

An infra-red study of CO adsorption on potassium-doped Pt(110)-(1 x 2): The long range potassium-CO interaction
B.E. Hayden (Southampton, U.K.), A.W. Robinson (Bath, U.K.) and P.M. Tucker (Wotton-Under-Edge, U.K.) 297

Yet another vibrational study of the adsorption system Pt(111)-CO
M. Tüshaus, A.M. Bradshaw (Berlin, F.R.G.), E. Schweizer (San Jose, CA, U.S.A.) and P. Hollins (Cardiff, U.K.) 305

Oxygen on Cu(100): a new type of an adsorbate induced reconstruction
M. Wuttig, R. Franchy and H. Ibach (Jülich, F.R.G.) 317

Hydrogen phonon spectra on transition metal surfaces: infrared reflection-absorption investigations of Mo(100), W(100), and Pt(111)
J.E. Reutt, Y.J. Chabal and S.B. Christman (Murray Hill, NJ, U.S.A.) 325

Deformation resonance approach to adsorbate induced relaxation
R. Hübner, G. Doyen (München, F.R.G.) and D. Drakova (Sofia, Bulgaria) 333

Generation of Rayleigh waves by picosecond laser pulses
D. Jost, H.P. Weber (Berne, Switzerland) and G. Benedek (Milano, Italy) 345

Phonons in graphite studied by EELS
J.L. Wilkes, R.E. Palmer and R.F. Willis (Cambridge, U.K.) 355

Application of the matching procedure to the calculation of phonon dispersion on Ni(100) covered with a C(2x2) overlayer
J. Szeftel, A. Khater and F. Mila (Gif sur Yvette, France) 361

Surface phonons and electronic surface states at Si(111)2x1: energy shifts and polarization effects
J.A. Schaefer (Kassel, F.R.G.), J. Anderson and G.J. Lapeyre (Bozeman, MT, U.S.A.) 373

Vibrational analysis of the reconstructed system Ni(100)+(2x2)C
F. Mila, J. Szeftel and N. Auby (Gif sur Yvette, France) 383

Surface vibrations on Ni(110); The role of surface stress
S. Lehwald, F. Wolf and H. Ibach (Jülich, F.R.G.) 393

Lattice dynamical study of the anomalous mode of W(001)
A.D. Kulkarni, F.W. De Wette (Austin, TX, U.S.A.) and J. Prade (Regensburg, F.R.G.) 397

Relaxation and dynamics of the(001)surfaces of $KZnF_3$ and $KMnF_3$
R. Reiger, U. Schröder (Regensburg, F.R.G.), J. Prade (Austin, TX, U.S.A.), F.W. De Wette and W. Kress (Stuttgart, F.R.G.) 403

Part B
Contents of Volume 45 (the second of two Conference volumes)

Time resolved electron energy loss spectroscopy of surface kinetics
W. Ho* (Ithaca, NY, U.S.A.) 1

Time-resolved electron energy loss spectroscopy (TREELS) of the kinetics of CO/Pt(111) and the catalytic oxidation of CO ON Pt(111)
H. Froitzheim and M. Schulze (Hannover, F.R.G.) 19

Time-domain measurements of vibrational relaxation at surfaces: CO(V=1) in metal carbonyl systems
R.R. Cavanagh, E.J. Heilweil and J.C. Stephenson (Gaithersburg, MD, U.S.A.) 31

Real time surface infrared spectroscopy in the study of surface reaction kinetics
V.A. Burrows* (Tempe, AZ, U.S.A.) 41

Infrared spectroscopy of ethylidyne on Pt(111)
I.J. Malik, M.E. Brubaker and M. Trenary (Chicago, IL, U.S.A.) 57

Surface enhanced Raman scattering at metal/vacuum interfaces
T. Lopez-Rios* (Paris, France) 65

Theory of resonant infrared photodesorption - influence of vibrational anharmonicity and V-V coupling on yields
Z.W. Gortel, P. Piercy, R. Teshima (Edmonton, Canada) and H.J. Kreuzer (Halifax, Canada) 79

Linear infrared spectra and laser-induced resonant desorption in the coadsorbate $^{12}C^{16}O/^{13}C^{16}O$ - NaCl
J. Heidberg, K.-W. Stahmer, H. Stein and H. Weiss (Hannover, F.R.G.) 87

Infrared spectroscopy of CO on NaCl film and NaCl(100)
H.H. Richardson and G.E. Ewing (Bloomington, IN, U.S.A.) 99

SERS of pyridine and picolines adsorbed on Ag island films - CT bands and Ag morphologies
H. Yamada, K. Toba and Y. Nakao (Nishinomiya, Japan) 113

Optical properties of dye molecules adsorbed on evaporated metal surfaces
H. Ueba, C. Tatsuyama and T. Moriguchi (Toyama, Japan) 123

Comparison of cross-sections for absorption and surface-enhanced resonance Raman scattering for rhodamine 6G at coagulated silver colloids
B. Pettinger and K. Krischer (Berlin, F.R.G.) 133

No evidence for local electromagnetic depolarization effects in SERS from coldly deposited silver films
I. Mrozek and A. Otto (Düsseldorf, F.R.G.) 143

Effect of the bulk concentration of formic acid on the distribution of the adsorbates at a smooth rhodium electrode in acid medium: An EMIRS investigation
M. Choy de Martinez, B. Beden, F. Hahn and C. Lamy (Poitiers, France) 153

Infrared reflection absorption spectra of reduced heptylviologen on a platinum electrode
H. Sasaki, M. Takahashi and M. Ito (Yokohama, Japan) 161

Vibrational and electronic properties of cyanide adsorbed on metal electrodes
M.R. Philpott, P.S. Bagus, C.J. Nelin and H. Seki (San Jose, CA, U.S.A.) 169

Surface and interface phonon and plasmon excitations in III-V semiconductor materials
R.G. Egdell, W.R. Flavell, Z.J.T. Gray-Grychowski, R.A. Stradling (London, U.K.), B.A. Joyce and J.H. Neave (Redhill, U.K.) 177

Enhanced infrared ATR spectra of surface layers using metal films
Y. Nakao and H. Yamada (Nishinomiya, Japan) 189

Vibrations in elastic and piezoelectric superlattices
A. Nougaoui (Oujda, Morocco) and B. Djafari-Rouhani (Mulhouse, France) 197

A tunnelling model for activated adsorption at metal surfaces
S. Holloway, D. Halstead and A. Hodgson (Liverpool, U.K.) 207

Vibrational phase relaxation at surfaces: The role of lateral interaction
B.N.J. Persson (Jülich, F.R.G.) and F.M. Hoffmann (Annandale, NJ, U.S.A.) 215

Vibrational excitation and inelastic scattering of CO from a Cu(100) surface via electron-hole pair formation
N. Crisa, G. Doyen (München, F.R.G.) and D. Drakova (Sofia, Bulgaria) 227

Pulsed laser-induced desorption from molecular systems studied by time-of-flight analysis: Measurement and interpretation
M. Buck and P. Hess (Heidelberg, F.R.G.) 237

Laser-induced resonant ablation of molecular solids on carbon films: Time of flight spectra as a function of coverage and fluence
J. Heidberg, C. Langowski, G. Neubauer (Hannover, F.R.G.) and M. Folman (Haifa, Israel) 249

Infrared laser stimulated desorption of adsorbates on metal surfaces
A. Dereux, J.-P. Vigneron, A. Peremans, J. Darville and J.-M. Gilles (Namur, Belgium) 261

Infrared spectra of species adsorbed on dispersed systems
A. Zecchina*, G. Spoto and D. Scarano (Torino, Italy) 269

Neutron inelastic spectroscopy of hydrogen adsorbed at different pressures on a Raney nickel catalyst
H. Jobic, G. Clugnet and A. Renouprez (Villeurbanne, France) 281

Some applications of surface Raman and infrared spectroscopies to mechanistic electrochemistry involving adsorbed species
M.J. Weaver, D.S. Corrigan, P. Gao, D. Gosztola and L.-W. H. Leung (West Lafayette, IN, U.S.A.) 291

In situ vibrational spectroelectrochemistry
S. Pons* (Salt Lake City, UT, U.S.A.) 303

Fourier transform electrochemically modulated infrared spectroscopy
F. Ozanam and J.-N. Chazalviel (Palaiseau, France) 323

Molecular beam studies of vibrational energy transfer and vibrational activation in molecule-surface collisions
C.T. Rettner* and D.J. Auerbach (San Jose, CA, U.S.A.) 335

Molecular beam scattering of CO from Cu(110): The effect of incident translational energy
B.E. Hayden and D.C. Godfrey (Southampton, U.K.) 351

Harpooning in scattering of $O_2^+$ from K-Ag(111)
P. Haochang (Shanghai, China), T.C.M. Horn and A.W. Kleyn (Amsterdam, The Netherlands) 361

Molecular scattering and vibrational spectroscopy at surfaces: A dynamic symbiosis
J.W. Gadzuk (Gaithersburg, MD, U.S.A.) 371

Stochastic trajectory simulations of vibrational energy flow at surfaces
J.C. Tully* (Murray Hill, NJ, U.S.A.) 381

The sticking of a reactive particle on a metal: Electron-hole pair and phonon energy loss
G.P. Brivio, A. Devescovi (Milano, Italy) and T.B. Grimley (Liverpool, U.K.) 391

Internal state selected velocity and population distribution of $D_2$ desorbing from clean Pd(100)
L. Schröter, G. Ahlers, H. Zacharias (Bielefeld, F.R.G.) and R. David (Jülich, F.R.G.) 403

Indirect phonon mediated adatom-adatom interaction
S.C. Tiersten, T.L. Reinecke (Washington, DC, U.S.A.) and S.C. Ying (Providence, RI, U.S.A.) 413

Time-resolved FT-IRAS at high pressures: Hydrogen assisted CO dissociation in the methanation reaction on Ru(001)
F.M. Hoffmann and J.L. Robbins (Annandale, NJ, U.S.A.) 421
